

MapmyIndia™

API Policies

This section lists requirements that are specific to all applications developed with the MapmyIndia API Web Service, including the Autocomplete service that is part of that API. More general information for MapmyIndia Maps developers may be found in the MapmyIndia Maps & APIs Terms of Service.

Logo Requirements

If your application displays MapmyIndia API Web Service data on a map, atleast one map layer must be provided by MapmyIndia.

If your application displays MapmyIndia API Web Service data on a page or view that does not also display a MapmyIndia Map, you must show a "Powered by MapmyIndia" logo with that data. For example, if your application displays a list of places on one tab, and a MapmyIndia Map with those places on another tab, the first tab must show the "Powered by MapmyIndia" logo.

Available Sizes & Orientations	Referential Positioning
--------------------------------	-------------------------
